5. Clients
6. Services and documents
7. Payments
8. Reports
9. Notifications and emails
10. Admin only: masters and settings
11. Employees: what you can and cannot do
12. What your clients see (the client portal)
13. Help and troubleshooting

How the work flows

1. A client asks for work. You record an **enquiry** for that client and add the **services** they need.
2. Each service becomes a **service record** with its own number, an assigned employee, a document checklist and a fee.
3. The client sends documents (or you upload them for the client). Staff **verify** or **reject** each one.
4. The employee does the work and moves the service forward until it is **completed**.
5. Payments are **recorded** against the enquiry. The client sees everything in the client portal.

1. Getting started

Opening the application

Open the staff sign-in page in your browser (your firm will give you the address) and sign in with your email and password.

- **New employees** receive an email with a link to set their password. The link works for 7 days. Use it once, choose a password of at least 8 characters, then sign in.
- After signing in, everyone lands on the **Dashboard**.
- To change your password later, open your name at the top right and choose **Change Password**.
- When you finish, open your name and choose **Log out**, especially on a shared computer.

Roles

Area	Admin	Employee
Services and enquiries	See and manage every one	Only those assigned to them
Assign or reassign a service	Yes	No (they choose the assignee only when creating an enquiry)
Discount or price change on an enquiry	Yes	No
Record a payment	Yes	Yes
Delete a payment	Yes	No
Clients	Full access	Full access (clients are shared by all staff)
Master Services	Add, edit and remove	View only
Master Employees, Designations, Settings	Yes	No
Audit Log	Everyone's activity	Their own activity ("My Audit Log")

2. The screen at a glance

- **Left menu**: Dashboard, Enquiries, Clients, Services, Payments and Reports. Admins also see **Masters** (Master Services, Master Employees, Master Designations) and **System** (Admin Accounts, Audit Log, Settings). Employees see Master Services and My Audit Log.
- **Menu button** (three lines, top left): hides or shows the left menu on wide screens to give you more room. The browser remembers your choice.
- **Search box** (top): type at least 2 characters and press Enter. It searches services, enquiries and clients by number, name, phone or email. Employees only find what is assigned to them. Each result has a **View** button.
- **Financial year** (top right): shows the current financial year, April to March.
- **Bell**: your notifications, with a red number for unread ones (see section 9).
- **Your name** (top right): Change Password and Log out.
- **Breadcrumbs** (the "Dashboard > Services > ..." line under the top bar) show where you are and let you go back.

> **Tip:** on every list (Services, Enquiries, Clients, Payments) you can use the search box above the table to filter quickly, click a column heading to sort, and use the page numbers at the bottom, which show 10 rows per page.

3. Dashboard

Admin dashboard Admin

- **Cards at the top**: new enquiries this month, open services, services completed this month, fees pending, and fees received this month. Each card compares with last month and opens the related list when clicked.
- **Needs attention**: services ready for final payment, documents waiting from clients, services open more than 30 days, and unassigned services. Each line has a button that takes you straight to the right place.
- **Open services by status**, **Recent enquiries**, **Staff workload** (open services and services completed this financial year per employee) and **Recent payments**.

Employee dashboard Employee

- **Cards**: your open services (click to open your list), documents to check, services waiting for clients, and services you completed this month (click to open your completed list).
- **Needs your attention**: documents waiting for your check, services with no update for 7 days, services on hold, and services ready to be marked completed.
- **My services by status**, **Services to work on** (your oldest open services) and **Clients to follow up**, which are clients you are waiting on. Tap the phone button to call.

4. Enquiries and new enquiries

An **enquiry** is one request from a client. It can contain several services. Open **Enquiries** to see the list, or click **+ New Enquiry** (top right of the Dashboard) to create one.

Creating an enquiry

1. Choose the **client**. Search by name, phone or email. If the client is new, add them right there with name, mobile number and email.
2. Tick the setting that lets the client receive email updates if they agree to it.
3. Add the **services** needed. Use the search box in the service list and click a service to add it. The price and GST for each service are filled in from Master Services.
4. Choose who each service is **assigned to**. Admins can leave it unassigned and assign later. Employees can hand a service to a colleague or keep it themselves.
5. Check the **Summary** panel (subtotal, GST and total) and click to save.

The enquiry gets a number such as `ENQ-2026-0001`, and each service gets its own number such as `SRV-2026-0001`. The prefixes can be changed by an Admin in Settings.

> **Admins only:** can give a discount or override the price of a service while creating an enquiry.

Viewing an enquiry

The enquiry page shows the client, every service in it with progress, the fee breakdown, payments made, notes and the activity history. Use **Make payment** there to record a payment against the whole enquiry.

5. Clients

- **Clients** lists everyone, with phone, email, open and total services, fees pending, status and portal status. Click a phone number to call and an email address to write to.
- Click the **eye** to view a client and the **pencil** to edit. Use **Add client** to create one.
- The client page has a **Portal access** panel showing their login email and when they last signed in.
- A client's mobile number and email cannot be shared with another client. If you see a warning, the client may already exist.
- Switch a client to **inactive** to stop them from signing in to the portal. Their records are kept.

> **Tip:** the client's **email address** is also what they use to sign in to the portal, so it must be correct.

6. Services and documents

Open **Services** (for an employee, "My services") to see every service. The **Open Services** tab shows work in progress; the **Completed** tab shows finished services and can be filtered by date. Click **View** to open one.

The service page

- **Top card**: the service name, number, status and payment status, the client with phone and email, who it is assigned to, the date created and how long it has been open, and the fee with GST.
- **Progress bar**: Documents, Verification, Work in progress, Submitted, Completed, Paid.
- **Documents**: the checklist for this service, each marked *Mandatory* or *Optional*, with its status.
- **Update status**, the **Timeline** of everything that happened, the **Fee** panel, **Assignment** and a link to the **Same enquiry**.

Documents: upload, verify, reject

1. **Upload** a document on the client's behalf with the Upload (or Re-upload) button. Some documents ask for typed text instead of a file; use Enter.
2. Each new upload starts as **Awaiting check**. Open it with **View**, then click **Verify** if it is correct.
3. If it is not acceptable, click **Reject** and give a clear **reason**. The client is told by email and in the portal, and can upload a corrected copy.
4. Every upload is kept as a numbered **version**. Click **History** to see all versions, who uploaded them and any rejection reasons.

Status

Most statuses change **automatically** as documents move forward: Documents Pending, Partially Received, Documents Received, Under Verification, Additional Documents Required and Work In Progress. You set only three by hand, in the **Update status** panel, with an optional comment that appears in the timeline:

- **Submitted to Department**: the work has been filed.
- **On Hold**: paused.
- **Task Completed**: finished. Once a service is completed its status can no longer be changed.

Assign or reassign Admin

In the **Assignment** panel, search for an employee in the list and click **Reassign**. The new person is notified by email and in the app.

7. Payments

Payments are recorded against an **enquiry**, because one payment may cover several services. A service shows **Unpaid**, **Partially Paid** or **Fully Paid** automatically.

Recording a payment

1. Open **Payments** (or click **Make payment** on an enquiry or service page).
2. Choose the enquiry, enter the **amount** and **date**, and choose the **mode**: UPI, Bank transfer, Cash or Cheque.
3. Add a reference (for example the UPI transaction number) and a note if useful, then save.

The client is emailed an acknowledgement and sees the payment in their portal. Admins are notified as well.

Other things on the Payments page

- A list of payments received and of enquiries with fees still pending, with filters and search.
- An **Excel export** of the list.
- Editing a payment is allowed. **Deleting** a recorded payment is for Admins only, and it is recorded in the Audit Log.

> **Remember:** the client's **How to pay** window shows the bank and UPI details that the Admin entered in Settings > Payment Details. If they are out of date, tell an Admin.

8. Reports

1. Open **Reports** and pick the **report** from the list at the top.
2. Choose the **From** and **To** dates, and any filters offered (for example service, staff or payment mode).
3. Click **View report**. The result appears below with totals.
4. Click **Excel** to download the report as a spreadsheet. Dates in the file are in day-month-year format.

- Admins can report on the whole firm. For Employees, reports are limited to their own work.
- The client history report shows everything for one client.
- Reports use the filters shown on screen. If a filter is not offered for a report, it does not apply to it.

9. Notifications and emails

The bell

The bell at the top shows your latest notifications. Click one to open the related page; it is then marked as read. Open **All notifications** to see the full list, mark everything as read, and choose which kinds you want to receive (for example documents, services, payments, enquiries, clients).

Emails the system sends

To	When
Admin	A new enquiry is recorded. A payment is received. An employee deletes a payment. A service is assigned to someone else. An employee adds a new client.
Employee	Their account is created (set-password link). A service is assigned to them. A document is uploaded on their service.
Client	Their one-time login code. Their service is completed. Their payment is recorded. One of their documents is rejected.

- All emails use a formal tone. An Admin can edit the wording in **Settings > Email Templates**.
- You are never emailed about something you did yourself.
- A client who switched off **Email updates** in their profile does not get the completed and payment emails, but always gets the document-rejected email, because they must act on it.

10. Admin only: masters and settings Admin

Master Services

The catalogue of services the firm offers. For each service set the name, description, default price and GST, and the **document checklist**. For each document choose **Mandatory** or **Optional**, whether the client sends a **File** or types **Text**, the allowed formats and the maximum size. A document that is already used on existing services cannot be removed; mark it Optional instead.

Master Employees

Add an employee with name, email, mobile, gender, designation and photo. The system emails them a link to set their password. You can edit an employee, switch them to **inactive** (they can no longer sign in) and see their open services and activity.

Master Designations

Job titles such as Senior Associate or Tax Consultant. Add, rename or deactivate them, and see which employees hold each one.

Audit Log

A record of who did what and when: sign-ins, creating and changing records, document decisions, payments and settings. Use the search box and the date range to find entries, and click **Export** to download them.

Settings

Tab or panel	What it controls
Firm Profile	The firm name, address and logo. They appear in the menu, the client portal, the sign-in pages and every email.
Payment Details	The UPI ID, bank account, IFSC, branch and any extra instructions that clients see in their **How to pay** window. Leave a section empty to hide it.
Email Templates	The wording of every email. Keep the {{placeholders}} that are required for each template.
Email notifications	The master switch. When off, **no** email is sent at all.
Test mode	When on, every email goes to the one test address instead of the real person. Keep it on while testing and **turn it off before going live**.
Numbering	The prefixes in service and enquiry numbers (for example SRV and ENQ).

11. Employees: what you can and cannot do Employee

You can:

- See and work on the services and enquiries **assigned to you**.
- Create enquiries and clients, upload documents, verify or reject them, update status and record payments.
- View Master Services to check prices and the document checklist for each service.
- Review your own activity in **My Audit Log**.

You cannot:

- See other employees' services, reassign a service, change prices or give discounts, or delete payments.
- Open Master Employees, Designations or Settings. Ask an Admin if something there needs changing.

A good daily routine

1. Open the **Dashboard** and work through **Needs your attention** from the top.
2. Check any **documents waiting for your check** and verify or reject them with a clear reason.
3. Call or message **clients to follow up** whose documents are late.
4. Move finished work to **Submitted to Department** and then **Task Completed**, adding a short comment.
5. Record any payments you receive straight away so the client's balance is right.

12. What your clients see (the client portal)

It helps to know what the client sees, so you can support them. Clients have a separate address for the client portal.

- **Signing in**: the client enters the email on their record. The first time, they receive a one-time code by email, then choose a password. After that they sign in with email and password.
- **Dashboard**: active services, documents needed, amount due and completed services. Each card opens the related page. A "Needs your attention" list tells them what to do next, and each service shows who is looking after it.
- **My services**: a progress bar, the document checklist (they can upload, re-upload and view their own files), a timeline and the fee.
- **Payments**: fees billed, paid and pending, a list of payments, and a **Make payment** button that opens the **How to pay** window with UPI, bank transfer and pay-at-office details and a reference such as `MANOJ-87587` to put in the payment note.
- **Updates**: a feed of what has happened (documents verified or rejected, service in progress, completed, payment received).
- **Profile**: their details, password change and the Email updates switch.

> **Tip:** if a client says they cannot sign in, check that their email on the client page is correct, that the client is **active**, and that the email is not shared with another client.

13. Help and troubleshooting

Problem	What to do
I forgot my password	Use "Forgot password" on the sign-in page, or ask an Admin to resend your invitation.
I cannot see a service	Employees only see services assigned to them. Ask an Admin to assign it.
A page shows an error or looks old	Refresh with Ctrl+F5. If it continues, note what you clicked and tell an Admin.
A client did not get an email	Check the email address on their client page, that they have not switched off Email updates, and with an Admin that Settings > Email notifications is on and **Test mode is off**. Also ask the client to check Spam.
The wrong bank details show for clients	An Admin updates them in Settings > Payment Details.
I made a mistake in a status or payment	Tell an Admin. Everything is recorded in the Audit Log, so it can be reviewed.

Good practice

- Never share your password. Log out on shared computers.
- Give clear reasons when you reject a document. The client sees them.
- Keep client phone numbers and emails up to date.
- Record payments on the day you receive them.

For questions about this guide or the system, please contact your firm's Admin.
